Chemical biology is a scientific discipline spanning the fields of chemistry and biology. The discipline involves the application of chemical techniques, analysis, and often small molecules produced through synthetic chemistry, to the study and manipulation of biological systems. In contrast to biochemistry, which involves the study of the chemistry of biomolecules and regulation of biochemical ...

The Dual Use Dilemma in Biological Research. The SERCEB Policy, Ethics and Law Core has developed an online module to assist those involved with the biological sciences in better understanding the dual use dilemma inherent in such research. This module is intended for graduate and post-doctoral students, faculty members, biosafety professionals, policy makers, and laboratory technicians ...

], with plumage structure that directly informs the evolutionary developmental pathway of feathers. This specimen provides an opportunity to document pristine feathers in direct association with a putative juvenile coelurosaur, preserving fine morphological details, including the spatial arrangement of follicles and feathers on the body, and micrometer-scale features of the plumage.
