Lecture 16: Electromagnetic Induction, Faraday's Law, Lenz

The problem of induction is the philosophical question of whether inductive reasoning leads to knowledge understood in the classic philosophical sense, highlighting the apparent lack of justification for: . Generalizing about the properties of a class of objects based on some number of observations of particular instances of that class (e.g., the inference that "all swans we have seen are ...

Une prémisse est une proposition, une affirmation avancée en support à une conclusion. Le terme de prémisse vient du latin praemissa, sous-entendu sententia, proposition mise en avant, de prae, en avant, et mittere, envoyer. Dans un syllogisme, les deux premières prémisses s'appellent la majeure et la mineure. La prémisse est toujours avancée en support à la conclusion.

In a 3 phase induction motor, when stator rmf rotates, it cuts the rotor bars and induces an emf in them. Is this emf sinusoidal? I mean shouldn't it be a square wave since the rotor "bars" are being cut by the flux, like in case of concentrated stator windings of a synchronous generator?

Le domaine de l'intuition est large : il concerne aussi bien la connaissance proprement dite (représentation du monde) que les sentiments (sur les choses) ou les motivations (à agir).

Generally speaking, instrumental scientific discourse assumes the 'facthood' of its representations and judgements "a form of quantitative identity between its concepts and objects in the world (which is why the distinction between numbers as concepts or as objects is an important one), which is to fashion the ratio described above instead as a 1:1 relationship..
