The socialist market economy of the People's Republic of China is the world's second largest economy by nominal GDP and the world's largest economy by purchasing power parity. Until 2015, China was the world's fastest-growing major economy, with growth rates averaging 10% over 30 years. Due to historical and political facts of China's developing economy, China's public sector accounts for a ...

The Great Recession met the IMF criteria for being a global recession only in the single calendar year 2009. That IMF definition requires a decline in annual real world GDP per capita. Despite the fact that quarterly data are being used as recession definition criteria by all G20 members, representing 85% of the world GDP, the International Monetary Fund (IMF) has decided "in the absence of ...
