

integer programming and combinatorial pdf

Linear programming (LP, also called linear optimization) is a method to achieve the best outcome (such as maximum profit or lowest cost) in a mathematical model whose requirements are represented by linear relationships. Linear programming is a special case of mathematical programming (also known as mathematical optimization).. More formally, linear programming is a technique for the ...

Linear programming - Wikipedia

In Operations Research, applied mathematics and theoretical computer science, combinatorial optimization is a topic that consists of finding an optimal object from a finite set of objects. In many such problems, exhaustive search is not tractable. It operates on the domain of those optimization problems, in which the set of feasible solutions is discrete or can be reduced to discrete, and in ...

Combinatorial optimization - Wikipedia

I have a bibtex database of optimization references (900K) available online. These are mostly interior point references. A searchable version of this bibliography is also available. I also have an unorganized list of announcements of computational packages that are available for solving a variety of problems. This page is not updated often enough, so some of the links are no longer functional.
