JWST Mission Operations Concept Document JWST-OPS-002018 Revision B CHECK THE JWST DATA BASE AT: <https://ngin.jwst.nasa.gov/> TO VERIFY THAT THIS IS THE CORRECT VERSION PRIOR TO USE. CM FOREWORD This document is a James Webb Space Telescope (JWST) Project Configuration Management (CM)-controlled document.

### **James Webb Space Telescope Project JWST Mission Operations**

The James Webb Space Telescope (also known as Webb or JWST) will be NASA's premier observatory of the next decade, serving thousands of astronomers worldwide. It will study every phase in the history of our Universe, ranging from the first luminous glows after the Big Bang, to the formation of solar systems capable of supporting life on planets like Earth, to the evolution of our own Solar System.

James Webb Space Telescope To fit inside the Ariane 5 rocket faring, the large primary mirror must be folded in sections for launch, then unfolded precisely into place after launch, making it the first segmented optical system deployed in space. Once in space, the sunshield will deploy to its full size and keep the telescope shadowed from the sun.

feature and explain how it is unique to the James Webb Space Telescope. The presentation could be a skit, a story, a graphic organizer, a PowerPoint show, or whatever format that will communicate the information you learned about the James Webb Space Telescope. Your teacher will direct you to work individually or in small groups.

JWST-ICRP 1 Final Report 1. Foreword The James Webb Space Telescope (JWST) was endorsed in the 2000 Astronomy Decadal report as its top-ranked project; JWST was widely recognized as the next Great Observatory to replace the Hubble Space Telescope (HST). The Decadal recommendation was accepted by NASA and

## **JWST-ICRP Report-FINAL 11010 kg**

The James Webb Space Telescope (JWST or "Webb") is a space telescope in construction that will be the successor to the Hubble Space Telescope. The JWST will provide greatly improved resolution and sensitivity over the Hubble, and will enable a broad range of investigations across the fields of astronomy and cosmology.

## **James Webb Space Telescope - Wikipedia**

The James Webb Space Telescope, the planned successor to the Hubble Telescope, is one of NASA's most complex and expensive projects. NASA recently announced that JWST's launch would be delayed several months, from October 2018 to no later than June 2019, because components of the telescope are taking longer to integrate than planned.

The coronagraphic capabilities provided by the James Webb Space Telescope (JWST) will reveal faint structures otherwise hidden by the glare of a bright point source. JWST Observer Events at the 50th Meeting of the Division...

## **STScI | James Webb Telescope (JWST)**

NASA's James Webb Space Telescope is the most ambitious and complex space science observatory ever built, capable of detecting light from the first stars and galaxies that formed in the universe and exploring planets around distant stars. With unmatched sensitivity, Webb will study every phase of our cosmic history, from the first stars and galaxies that formed out of the darkness of the ...
