Agile is a software development methodology where the agile team is more concerned with developing the software and releasing it. DevOps, on the other hand, is all about taking software which is ready for release and deploying it, safely and reliably.

## How are DevOps and Agile different? - Quora

Rational Team Concert is a software development team collaboration tool developed by the Rational Software brand of IBM, who first released it in 2008. The software is available in both client versions, a web

version, and on Cloud. It provides a collaborative environment that software development teams use to manage all aspects of their work—such as plans, tasks, revision control, build ...

Neuropsychological tests are specifically designed tasks used to measure a psychological function known to be linked to a particular brain structure or pathway. Tests are used for research into brain function and in a clinical setting for the diagnosis of deficits. They usually involve the systematic administration of clearly defined procedures in a formal environment.
