reach the goal. This is because when goals are acted upon, more attention is directed to the activity specified by the goal, than other non-goal related activities.

Goal-Setting For Safety

Complexity characterises the behaviour of a system or model whose components interact in multiple ways and follow local rules, meaning there is no reasonable higher instruction to define the various possible interactions.. The term is generally used to characterize something with many parts where those parts interact with each other in multiple ways, culminating in a higher order of emergence ...
